Hope Scholarship

2012-2016

● experience

EFNEP USDA

2016–Current

- Created graphics and education material used in EFNEP class sessions to aid in educating low-income and vulnerable populations.
- Kickstarted social media presence by 5X with videos, related non-profit campaigns and outreach graphics.
- Overhauled existing design in enrollment forms that led to 2X increase in general enrollment in fall 2016.
- Built website from the ground up with user-centered design thinking.
- Developed high fidelity website prototypes, created typography and color palettes and considered constraints based on research.
- Created lower-third animations in After Effects for interviews and videos used as marketing material.

Quantum Bakery

2014–Current

- Prototyped mobile app for Android and iOS.
- Designed UI and animations for mobile app.
- Composed graphics and layouts for two highly successful Kickstarter campaigns, collectively raising over \$650,000 in funding – Glow and Figment VR.
- Built website with developers with user-centered design and contributed sitemaps, wireframing and prototypes.

The Red and Black

2015–2016

- Designed primarily for print, taking into consideration basic foundational design principles such as grids, rulers and guides, margins, information hierarchy with heavy focus on typography and composition.
- Delivered design work on a strict, weekly deadline for publication, with 10,000 copies of print distributed across campus every week.

Axon Tutors

2014–2015

- Led design direction, spearheading look and feel, color palettes and typography for brand.
- Assembled and edited all photography used for social media and advertising platforms.
